

Information

Installing Cara CAD

Ladies and Gentlemen,

In the next few days we will begin with the set up and installation of your Heraeus – Cara system.

To use the system to its fullest potential, we ask you to note the following points and to correct or attend to them before the installation date.

Procedure:

- Set up components
- Registration and set up of software
- Instruction on hardware and software

Location:

- Please set up a suitable location:
Vibration-free, dust reduced and with no direct sunlight.
- Please provide enough space for PC (Tower) mouse and keyboard.

Mains supply:

- 3 mains sockets or multiple socket extension

Telephone connection/ DSL/ Network:

- The system is set up ex-works with a standard network connection; please provide a 100 Mbit Cat.5e patch cable (network cable).

- Please check in advance which connection you have available (DSL/ ISDN).
- The computer is set up for connection to a LAN direct to the DSL router. This connection must have access to the internet.
- If you use an internal network, your IT professional must ensure FTP access is available for receiving and sending data.
- As the Cara system is registered online, you must ensure any complications caused by missing passwords or network identification are eliminated in advance. Please consult your IT professional.
- The network cable should be connected from router or telephone socket to the scanner.
- WLAN (wireless local area network) via a USB stick is not compatible (hardware conflict). However, there is a possibility of wireless connection by installing a WLAN PCI card. The installation must be carried out by you before activation. If your IT and telephone technician adapts and connects the PC to the internet before activation, please tell us in time so we can send the appliances to you earlier.

All other connections must be set up separately in advance!

To the point:

- Location
- 3 sockets
- network cable
- Internet access

The Heraeus sales personnel or service technician will gladly help with any enquiries!

The Heraeus Cara Team
